AB	This invention discloses an accelerating admixt. for hydraulic binders comprising of: (a) the reaction products of an alkali metal inorg. substance reacting with a mixture of a carboxylic acid and/or a hydrohalogenic acid (e.g., HF); (b) aluminum sulfate; (c) a manganese carbonate or sulfate; (d) amorphous aluminum hydroxide; and optionally (e) a lithium salt, and/or an amino acid, or an amino acid aluminum salt, or a mixture of aluminum sulfate with amino acid. The alkaline substance is sodium or potassium hydroxide and/or sodium or potassium aluminate. The lithium salt is lithium hydroxide or lithium cryolite. The amino acid is glycine.
